## Summary

I have 8+ years of development and project management experience with the last 3 years of expertise in Golang, MERN, MEVN developer. Especially, I have rich experience in Front-end, RESTfull API, GraphQL development. Also I have enough experience in MongoDB, MySQL, MSSQL, Sqlite, PostgreeSQL management and C++/Python development.

I am looking for long-term opportunities that appreciate high-quality standards with quality and maintenance code. I very well understand the preciousness of time, and so I have always submitted my jobs in allotted time. I am really looking forward to start the project as soon as possible with your permission. Thanks for considering.

## Skill Highlights
